

# INNOVATIVE

TECHNICAL SERVICES, LLC

*Comprehensive Engineering Solutions*

*Innovative Technical Services specializes in providing mechanical engineering, process engineering and project management services. We supplement these capabilities with electrical and civil engineering services as needed to meet project requirements. We offer a wealth of knowledge, expertise, and experience developing and managing multi-discipline design projects. Work with us and you'll find we not only offer solid, cost-effective engineering solutions, but we always strive to exceed expectations.*

*InTech is a member of the American Petroleum Institute and actively serves on multiple production measurement and allocation committees.*

## THE INTECH VALUE ADDED DIFFERENCE

Founded in 2001, Innovative Technical Services, LLC (InTech) is an SBA-certified small, minority, and woman-owned business offering an experienced staff of professionals to supply superior engineering solutions for a variety of customers.

Our team provides traditional engineering services from project concept through detailed design, testing, start-up and evaluation. We also offer specialty engineering services including process simulation, hydraulic analyses, process studies, and measurement and allocation. In addition, we assist clients in developing guidelines for the distribution of oil and gas sales to the individual owners of onshore and offshore facilities.

InTech brings enhanced value to our clients by working closely with them to understand their needs and develop customized solutions that maximize potential savings, increase efficiency and improve reliability.

# INTECH ENGINEERING SERVICES

## *Mechanical Engineering*

InTech provides across-the-board mechanical engineering services from project conception and detailed design through construction and start-up. We have extensive experience designing process piping systems, pipelines, pumping stations, storage tanks and pressure vessels.

## *Process Engineering*

InTech provides wide-ranging process engineering services including hydraulic analysis, energy & mass balances, vapor pressure studies, transient & surge analysis, thermal expansion & relief analysis, process simulation and model development.

## *Project Management*

InTech provides comprehensive project management services emphasizing integrated project management support. We work with clients to understand their needs. We can also facilitate project development to clearly define goals and objectives and increase stakeholder involvement. Once the project objectives are defined, we develop integrated execution processes tailored to conform to client's standard procedures. We can aid in:

- Defining scope and project goals
- Establishing work processes
- Managing project execution using accepted metrics and standards
- Facilitating stakeholder participation
- Enabling stakeholder concerns to be addressed
- Risk identification and risk mitigation plans
- Developing closeout plans

# CLIENTS

*Throughout our history, we have provided superior service to government and private sector clients including:*

- BP America Production Company
- Bruce Power
- Chevron North America Deepwater Exploration & Production
- DynMcDermott Petroleum Operations Company
- P2 Energy Solutions
- SAFER E&P Operations Company
- Shell Exploration and Production Co.
- Stolthaven New Orleans
- URS Corporation
- U.S. Department of Energy
- Vali Cooper International
- Williams Field Services – Gulf Coast Company L.P.
